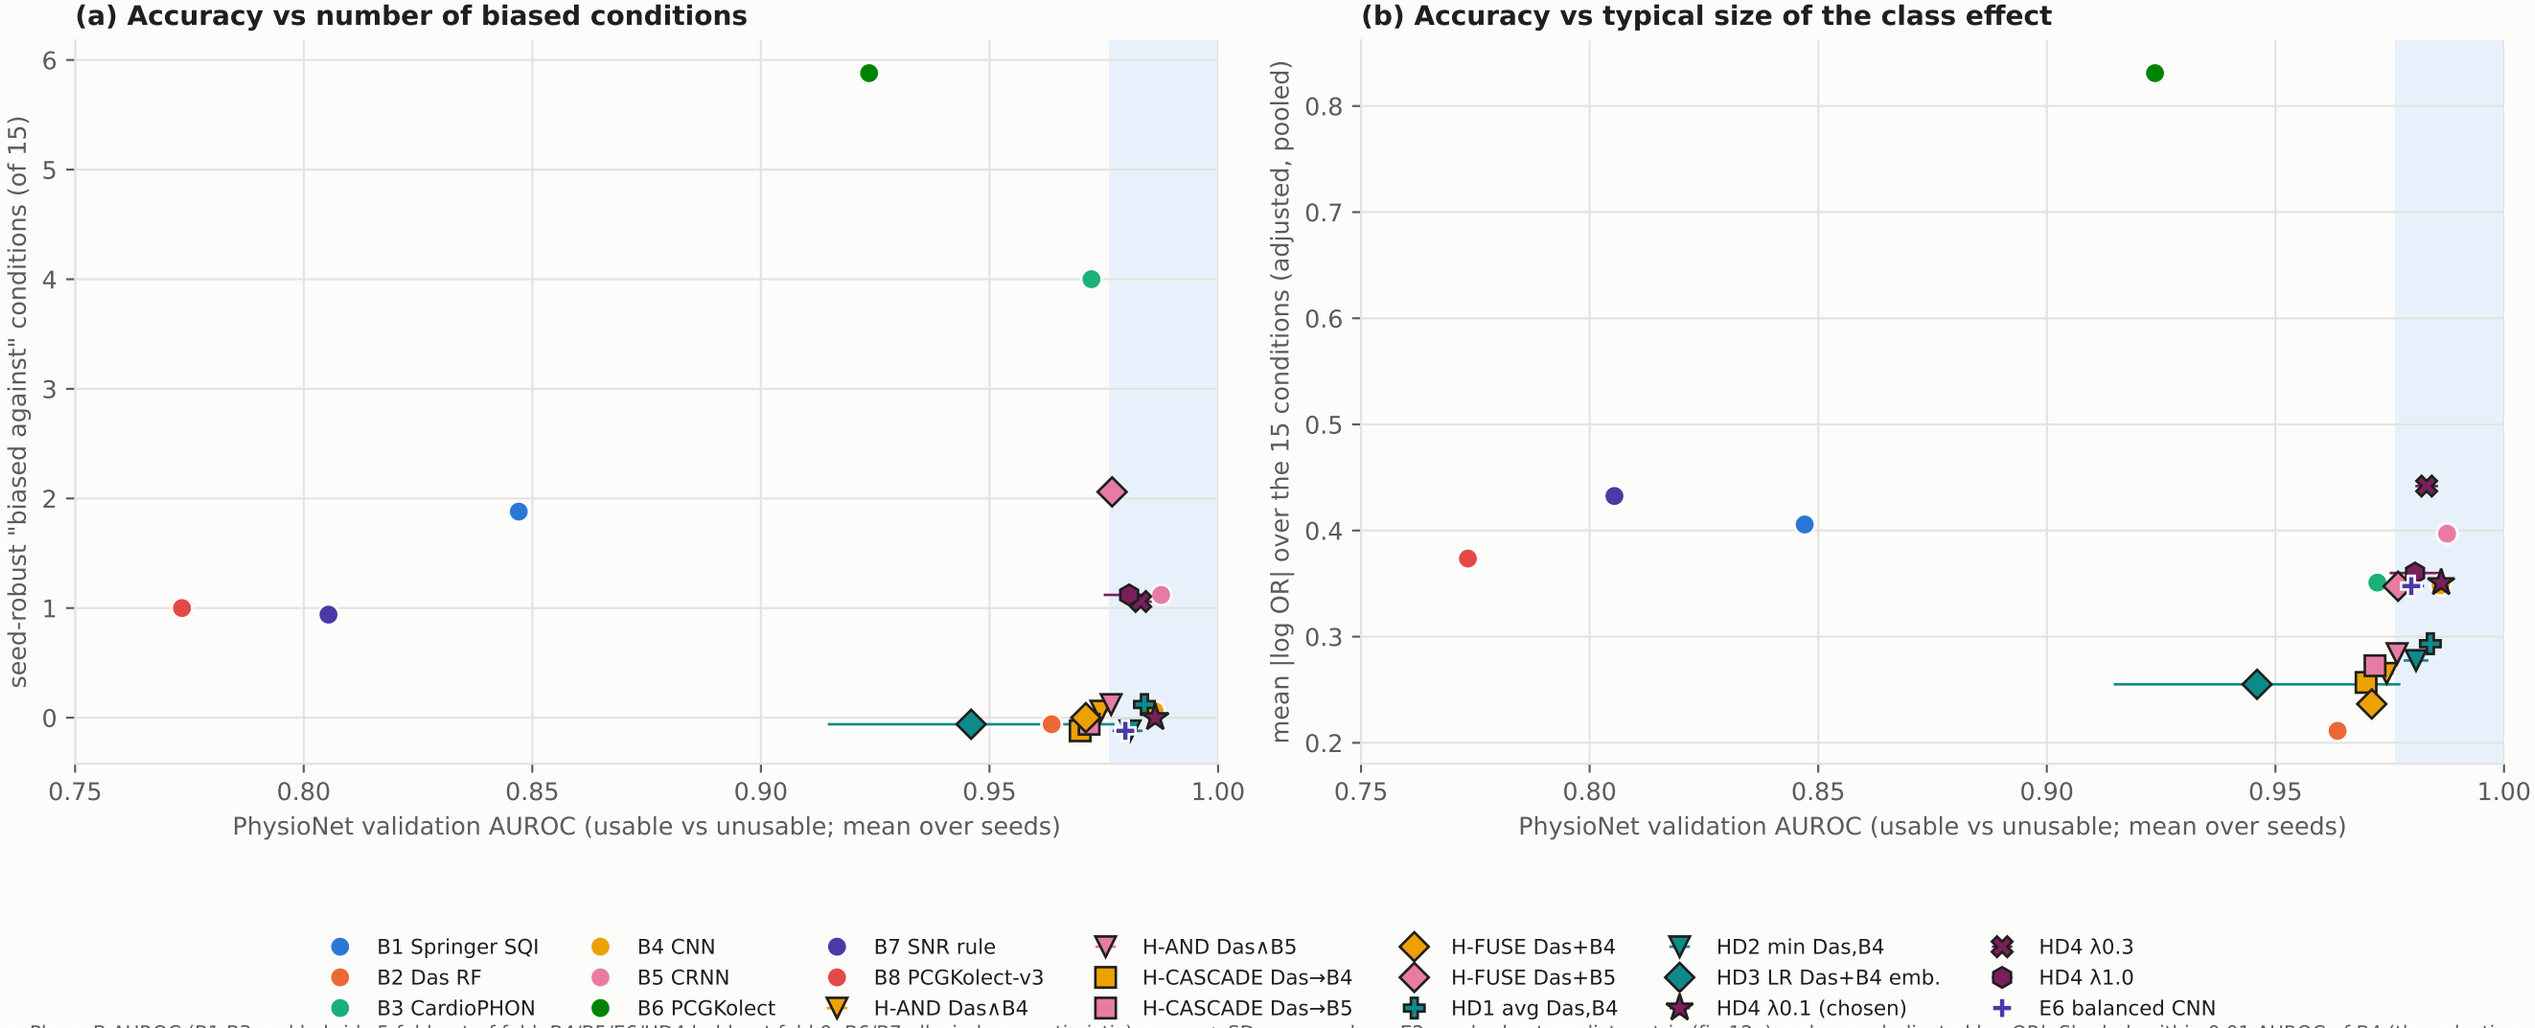
Debiased hybrids: accuracy vs bias, all models (best = right and low)



x: Phase B AUROC (B1-B3 and hybrids 5-fold out-of-fold; B4/B5/E6/HD4 held-out fold 0; B6/B7 all windows, optimistic), mean ± SD over seeds. y: E2 seed-robust verdict matrix (fig 12a) and mean |adjusted log OR|. Shaded: within 0.01 AUROC of B4 (the selection rule's accuracy margin). Large star = chosen HD4 λ0.1.
